

We're going live with settrax®

Effective

all vendor instrument trays must be documented in Settrax before our department can accept them for processing.

Why This Change:

We're streamlining compliance, tracking, and vendor communication to better serve our department and positively impact patient safety.

What This Means for You:

- Vendor Reps are required to check in loaners at the Settrax Kiosk, documenting tray weight, capturing photos, and print case specific labels all in one streamlined process.
- Vendor Reps must use the kiosk to check trays out when they leave — this tracks missing or damaged items, eliminating mystery invoices.

How to Get Ready for the Switch:

- Scan the QR code to register early to secure your subscription.
- Explore the system and start building your loaner library.
- Ask your department leadership for your special discount code.

WELCOME TO SETTRAX

Quick Start Guide

Your new tool for clear, transparent, and efficient vendor loaner management.

Why Settrax?

Clear Communication

One source of truth for loaner case details

Transparency

View the schedule, deliveries, and confirmations in real time.

Whats Changing?

Before Settrax	With Settrax
Case info scattered across emails, calls, and texts	All case info in one system
Handwritten, unclear labels	Easy to read, printed labels
Delayed updates on case changes	Clear status updates and notifications for case changes
Manual Loaner Documentation	Digital, searchable loaner records
